

# Archaeological Consultants

The NH Division of Historical Resources (NHDHR) maintains a list of qualified archaeologists who are actively working in NH for project proponents who require professional archaeological services. This list is provided as a service to the public and is published with the understanding that the NHDHR does not recommend, endorse, or assume responsibility for the quality of work of any individual or firm on this list. Project proponents should perform due diligence by checking credentials and obtaining multiple bids when hiring a consultant. Consultants are added to the list at their request if they meet the qualifications under 36CFR61, the Secretary of the Interior's Professional Qualification Standard for Archaeology and meet NHDHR's additional qualifications. Consultants are identified as meeting qualifications for pre-contact, post-contact and/or underwater archaeological services. The list is arranged alphabetically by firm or by last name of individual if there is no firm name given.

Website: [searchinc.com](http://searchinc.com)

SEARCH provides a full range of traditional and specialized services in archaeology, architectural history, historic preservation, conservation/curation, public outreach, and national and state regulatory compliance. Our architectural history capabilities include restoration and reuse planning, economic analysis, HABS, HAER, and HALS recordation standards, and tax credit eligibility assessments. SEARCH also provides highly specialized tasks in maritime archaeology, with USACE-certified divers and experts in historic shipwrecks, submerged prehistoric resources, remote sensing, and conservation. We have a best-in-industry reputation for emergency and rapid response, major project logistics, and provide innovative, cost-effective alternatives to traditional mitigations including Ground Penetrating Radar (GPR), LiDAR-based predictive modeling, and high-density laser scanning.
